

ServiceNow 201:

5 - GlideSystem

Exercises

1. Log all **Incident** numbers to the screen where the caller is the **current user**
2. Print the following sys_property value to the screen: **change.conflict.role**
3. Register a new **Event** and assign the event to an **Email Notification**
4. Create a **Business Rule** on the **Problem** table to show a message (`gs.addInfoMessage()`) to the screen after a **Problem** record is **updated**

NOTE: Use background scripts for exercise 1 and 2
