Exercises

1. Navigate to the **Background Script** and create 2 **GlideDateTime** objects.
2. Initialize the first **GlideDateTime** object using the following string: **"2017-01-03 12:00:00"**
3. Initialize the second **GlideDateTime** with the current date and time.
4. Now use the following methods on the 2 **GlideDateTime** objects
   a. `before()`
   b. `after()`
   c. `compareTo()`
   d. `equals()`

NOTE: Use a background script for these exercises
